Adam Lacroix Sneed

Austin, TX · 512.888.5580 · adam@adamsneed.com · adamsneed.com · LinkedIn

Manager, Global Cyber Security. Security-focused engineering leader with deep expertise in PAM, IAM, and enterprise cybersecurity. 20+ years in IT/security with 4+ years focused on enterprise PAM engineering, automation, and compliance. Combines hands-on engineering leadership with team management to deliver credential vaulting, session management, and service account governance across on-prem and cloud environments.

TECHNICAL SKILLS

PAM/EPM Architecture · IAM & Identity Governance · Credential Vaulting · Identity Lifecycle · SIEM/SOAR & ITSM · Zero Trust · Cloud IAM (AWS/Azure/GCP) · AD/Entra ID · PowerShell · Python · SQL · REST APIs · Terraform & Ansible · CI/CD Pipelines · Non-Human Identity Governance · AI Agent Access & MCP · LLM-Assisted Engineering · Local LLM Inference · Policy Enforcement · NIST/CIS/ISO 27001 · SOX/PCI · Agile (Scrum/Kanban)

PROFESSIONAL EXPERIENCE

McDonald's Corporation

Remote from Austin, TX

Manager, Global Cyber Security · Apr 2026 – Present

- Lead PAM platform engineering, operations, and service delivery across a Fortune 100 enterprise's on-prem and multi-cloud environments.
- Drive PAM strategy, roadmap, and governance aligned with Zero Trust, least privilege, risk management, and compliance.
- Partner with security architecture, identity, infrastructure, and audit teams to integrate PAM with SIEM, ITSM, and DevOps/CI-CD workflows.
- Lead and mentor PAM engineers; establish runbooks, SOPs, and operational standards for program maturity.
- Own enterprise selection and program design for non-human identity governance across service accounts, workload identities, and AI agent credentials.

Netwrix Corporation

Remote from Austin, TX

Senior Solutions Architect, Privileged Access Management · Sep 2021 – Apr 2026

- PAM subject matter expert for enterprise deployments across Fortune-class organizations — credential vaulting, session proxying, JIT access, and service account governance integrated with AD/Entra ID, AWS/Azure cloud IAM, SIEM/SOAR, and ITSM platforms.
- Architect API-driven automation frameworks (PowerShell, Python, REST APIs) for privileged account lifecycle management — onboarding, credential rotation, and access workflows enforcing least-privilege at scale.
- Led root cause analysis, platform tuning, Agile delivery, and operational KB/runbook/SOP development; oversaw vendor-led SOW scoping, UAT, and production cutovers.
- Designed a TypeScript MCP server exposing the Netwrix Privilege Secure REST API to LLM workflows for ephemeral admin sessions, rotation reporting, and access automation.
- Pioneered AI-assisted engineering with Claude Code and built local Ollama inference for security-sensitive use cases; concurrently architected independent PAM platform IP (Moat).

🏆 **Netwrix Hero Award** · Q1 FY'25 — Excellence in enterprise PAM solution delivery

GCS Technologies

Austin, TX · 2012 – 2021

Director of Operations | Technical Support Manager | Datacenter Team Lead

- Progressed from datacenter operations to directing a business unit — P&L ownership, strategic initiatives, and a 30-member team while exceeding revenue targets for seven consecutive quarters.
- Built training programs increasing team utilization from 73% to 86%; designed customer feedback loops that measurably improved retention.
- Led cross-functional security initiatives aligning IAM practices with compliance requirements and business objectives.

Early Career: RedHat Linux & AIX Unix Administrator — University of Texas at Austin IT · Security Management Services LLC

EDUCATION & CERTIFICATIONS

Juris Doctor / Graduate Diploma in Civil Law
Louisiana State University, Paul M. Hebert Law Center

BA in Government, Minor in Biology
University of Texas at Austin

CompTIA Security+ CE
Microsoft Certified: Azure Fundamentals

Member, State Bar of Texas
